Change Log

Rev.	Date	Note
1	2015-10-26	First release
2	2016-06-21	Correct typos
3	2017-06-08	Set previous address fields as optionals
4	2020-03-31	Add councilExpenditure, phoneExpenditure, alcoholExpenditure, householdExpenditure, socialisingExpenditure, restaurantExpenditure, educationExpenditure, healthBeautyExpenditure, clothingExpenditure, existingLoanExpenditure, loanNumber, adultAddress fields
6	2020-10-19	Add typeOfHousing and rentSplitWith fields
7	2023-10-17	Update title enum values

Introduction

This document describes how to integrate with the Stop Go Networks (SGN) OnePost lead posting system.

The service allows affiliates to post leads to the top of Stop Go Networks pingtree. This service does not support tiered posts. Instead it is designed to be used by an affiliate who wishes to run their own lead generation site hosting their own application form, but do not want to operate and maintain their own pingtree.

When a lead is posted to the service it is first validated. If the validation is passed then a redirect URL to the service waiting page is immediately returned. The affiliate should redirect the applicant to this waiting page URL. From this point on the lead is owned by the lead posting system and will handle all future interaction.

If and when the lead becomes payable it will be reported in the Stop Go Networks affiliate system. Optionally a tracking pixel can be fired back to the affiliate.

Lead posting

Service is available through an HTTP POST method both multipart/form-data and application/x-www-form-urlencoded data formats.

Testing credentials

URL: <http://api-uk-test.stopgonet.com/submit/onepost2>

aff: TEST

apiToken: onepost-payday

Live credentials

Will be provided to you upon successful integration with our test environment.

Field Descriptions

Field Name	Type	Required	Allowed Values / Description	Example
aff	VARCHAR(30)	Y	Allocated by SGN	Provided by SGN
apiToken	VARCHAR(40)	Y	Allocated by SGN	Provided by SGN
subAff	VARCHAR(30)	Y	Your sub-affiliate source ID [A-Za-z0-9]. This can be anonymised but is important as it is used by SGN and our lead buyers in order to manage redirect rates and lead quality at the sub-affiliate level.	A23
sid	VARCHAR(100)	N	A reference for your tracking purposes	ABC12345
amount	INTEGER	Y	The loan amount applied for	2000
termMonth	INTEGER	N	Expected duration of repayment in months. Default 1	6
title	ENUM	Y	See Table 8	Mr
firstName	VARCHAR(50)	Y		George
lastName	VARCHAR(50)	Y		Smiley
mobilePhone	CHAR(11)	Y	Only digits (11 digits)	07777777777
homePhone	CHAR(11)	Y	Only digits (10 or 11 digits)	0141000000
workPhone	CHAR(11)	N	Only digits (10 or 11 digits)	0141000000
dob	DATE	Y	Date of birth: (YYYY-MM-DD)	2014-03-12
email	VARCHAR(100)	Y		test@test.com
postalCode	VARCHAR(10)	Y		G12 8AG
extendedAddress	VARCHAR(20)	Y	House name/number of home address	Flat C
streetAddress	VARCHAR(100)	Y		Bywater Street
locality	VARCHAR(50)	Y	City	London
county	VARCHAR(50)	Y		City Of London
homeOwner	ENUM	Y	See Table 2	Homeowner
timeAddress	ENUM	Y	See Table 3	2 Months
adultAddress	ENUM	N	The number of adults living at the address (including applicant) See Table 13	
typeOfHousing	ENUM	N	See Table 14	1bed
rentSplitWith	ENUM	N	See Table 15	5plus

employmentType	ENUM	Y	See Table 4	Part-time
company	VARCHAR(50)	Y		ACME LTD
industry	ENUM	Y	See Table 5	
timeJob	ENUM	Y	See Table 3	2 Months
jobTitle	VARCHAR(50)	N		Dishwasher
directDeposit	ENUM	Y	Y,N	N
income	INTEGER	Y	Monthly net income	1250
frequency	ENUM	Y	See Table 6	Weekly
payDate	DATE	Y	(YYYY-MM-DD)	2014-03-12
payDateNext	DATE	Y	(YYYY-MM-DD)	2014-03-19
housingExpenditure	INTEGER	Y	Monthly mortgage or rent [value >= 0]	100
creditExpenditure	INTEGER	Y	Monthly credit [value >= 0]	10
utilitiesExpenditure	INTEGER	Y	Monthly utilities/bills [value >= 0]	0
transportExpenditure	INTEGER	Y	Monthly transport [value >= 0]	100
foodExpenditure	INTEGER	Y	Monthly food [value >= 0]	10
otherExpenditure	INTEGER	Y	Other Monthly Outgoings (e.g. food/bills/council tax) [value >= 0]	100
councilExpenditure	INTEGER	N	Monthly spend on council tax and other council related [value >= 0]	100
phoneExpenditure	INTEGER	N	Monthly spend on phone, internet and TV [value >= 0]	100
alcoholExpenditure	INTEGER	N	Monthly spend on alcoholic drinks and tobacco. Exclude: drinking out e.g. bars, pubs, etc.. [value >= 0]	100
householdExpenditure	INTEGER	N	Monthly spend on electrical appliances, tools, furnishings, maintenance and alike. [value >= 0]	100
socialisingExpenditure	INTEGER	N	Monthly spend on nights out and holidays. Exclude: eating out. [value >= 0]	100
restaurantExpenditure	INTEGER	N	Monthly spend on eating out and takeaways [value >= 0]	100

educationExpenditure	INTEGER	N	Monthly spend on tuition fees and any educational course fees. Exclude: student loans. [value >= 0]	100
healthBeautyExpenditure	INTEGER	N	Monthly spend on beauty products e.g. makeup, beauty treatments, haircuts, etc. [value >= 0]	100
clothingExpenditure	INTEGER	N	Monthly spend on clothing and footwear [value >= 0]	100
existingLoanExpenditure	INTEGER	N	[value >= 0]	100
loanNumber	ENUM	N	Number of loans in last last 90 days See Table 12	
accountNumber	VARCHAR(8)	Y	Only digits	12345678
sortCode	VARCHAR(6)	Y	Only digits	123456
cardType	ENUM	Y	See Table 7	SW
bankOnline	ENUM	N	Y,N	Y
mailing	ENUM	Y	Y,N See Error: Reference source not found section	N
termsAgreed	ENUM	Y	Y,N See Error: Reference source not found section	Y
userAgent	VARCHAR(100)	Y	User agent string of applicant's browser	Mozilla/5.0 (iPad; CPU OS 6_1_3 like Mac OS X) AppleWebKit/536.26 (KHTML, like Gecko) Version/6.0 Mobile/10B329 Safari/8536.25
domain	VARCHAR(100)	Y	The domain name of the website where the lead was generated. Must be covered by the affiliates CCL (Consumer Credit Licence)	testsite.com
ipAddress	VARCHAR(20)	Y	IP address of applicant's computer	80.80.80.8
maritalStatus	ENUM	Y	See Table 9	
dependentsNumber	ENUM	Y	See Table 10	
purpose	ENUM	Y	See Table 11	

confirmedFC	ENUM	Y	Y,N Has customer confirmed they have provided accurate financial information and considered potential future income and outgoings in determining ability to repay? A value of 'N' will limit the lead buyers we can show the lead to.	
guarantor	ENUM	N	Y,N User has a loan guarantor	Y
prevPostalCode	VARCHAR(10)	N	The customer's previous postal code	G12 8AG
prevExtendedAddress	VARCHAR(20)	N	The customer's previous House name/number of home address	Flat C
prevStreetAddress	VARCHAR(100)	N	The customer's previous street address	Bywater Street
prevLocality	VARCHAR(50)	N	The customer's previous city	London
prevCounty	VARCHAR(50)	N	The customer's previous county	City Of London
prevHomeOwner	ENUM	N	The customer's previous home owner See Table 2	Homeowner
prevTimeAddress	ENUM	N	The customer's previous time at address See Table 3	2 Months

Terms Agreed And Mailing Fields

Before submitting the lead you must ensure that the applicant has agreed to the terms laid out in the Stop Go Networks privacy policy.

By submitting the lead with the **termsAgreed** field set to 'Y' you are confirming that this is the case. If the value of **termsAgreed** is set to 'N' we can not accept and process the lead and it will be rejected.

The **mailing** field is an indication of whether the applicant has opted in to receiving further marketing messages from Stop Go Networks Ltd.

Testing

While you are on test mode, the system provides real responses to help you with the integration process. The responses will tell you if there is any issue with the format of the data sent with the lead. You can send as many test leads as needed.

Your testing should include receipt of accept, reject and fail responses.

You can simulate an accept by sending data with firstName = "Accept".

You can force a fail by sending incorrect data, for example:

- Send a request without 'aff' parameter
- Send a request with some errors on lead fields. E.g. invalid 'payDate', empty 'firstName'

Please do not send real data for testing!

Responses

The response will be an XML document.

Element	Description
status	FAIL Post lead failed for validation errors or other reasons OK Posted lead is accepted REJECT Post lead is rejected
reference	Unique Transaction ID available when posted lead is accepted
redirectUrl	Redirect URL where applicant MUST be redirected
postId	Unique reference with every response
message	Details (if any) of a failed/reject post

Table 1: Response elements

An accept response

XML structure is:

```
<?xml version="1.0" encoding="UTF-8" ?>
<response>
  <status>OK</status>
  <redirectUrl>value</redirectUrl>
  <reference>value</reference>
  <postId>value</postId>
</response>
```

Example:

```
<?xml version="1.0" encoding="UTF-8" ?>
<response>
  <status>OK</status>
  <redirectUrl><![CDATA[https://domain/something?id=287&key=3cacd3ba6]]</redirectUrl>
  <reference>31045</reference>
  <postId>12</postId>
</response>
```

A reject response

XML structure is:

```
<?xml version="1.0" encoding="UTF-8" ?>
<response>
  <status>REJECT</status>
  <message>A message here</message>
  <postId>12</postId>
</response>
```

Example:

```
<?xml version="1.0" encoding="UTF-8" ?>
<response>
  <status>REJECT</status>
  <message>No matches</message>
  <postId>12</postId>
</response>
```

A fail response

XML structure is:

```
<?xml version="1.0" encoding="UTF-8" ?>
<response>
  <status>FAIL</status>
  <message>A message here</message>
  <postId>12</postId>
</response>
```

Examples:

```
<?xml version="1.0" encoding="UTF-8" ?>
<response>
  <status>FAIL</status>
  <message>A message here</message>
  <postId>12</postId>
</response>
```

Additional information may also be present. If field validation errors occurs these will be detailed in an optional `<errors>` tag:

```
<?xml version="1.0" encoding="UTF-8" ?>
<response>
  <status>FAIL</status>
  <message>Errors found</message>
  <errors>
    <workPhone>Please enter your Work Phone</workPhone>
    <bankName>Please enter your Bank Name</bankName>
    <accountNumber>Please enter your Bank Account Number</accountNumber>
  </errors>
  <postId>12</postId>
</response>
```

PHP Example code

```
$urlToCall = 'http://api-uk-test.stopgonet.com:81/submit/onepost2'

$arrayToPost = array();
$arrayToPost['aff'] = 'TEST';
$arrayToPost['apiToken'] = 'onepost-payday';
$arrayToPost['subAff'] = 'AB677TEST';
...
...
...

$ch = curl_init($urlToCall);
curl_setopt($ch, CURLOPT_RETURNTRANSFER, TRUE);
curl_setopt($ch, CURLOPT_NOSIGNAL, TRUE);
curl_setopt($ch, CURLOPT_SSL_VERIFYPEER, FALSE);
curl_setopt($ch, CURLOPT_SSL_VERIFYHOST, 0);
curl_setopt($ch, CURLOPT_POST, TRUE);
curl_setopt($ch, CURLOPT_HEADER, FALSE);

$postAsMultipart = TRUE;

if ($postAsMultipart) {
    curl_setopt($ch, CURLOPT_POSTFIELDS, $arrayToPost);
} else {
    $query = http_build_query($arrayToPost);
    curl_setopt($ch, CURLOPT_POSTFIELDS, $query);
}

$result = curl_exec($ch);
curl_close($ch);
```
