#### Introduction

This document describes how to call a Stop Go Networks website in 'affiliate mode' and prepopulate the fields in the application form. All Stop Go Networks sites support this facility.

Also all entry pages into Stop Go Networks sites can be used (not just the apply page) although in general most affiliates will probably wish to use the site homepage of the application page as the entry point.

Once the applicant has entered the site the pre-populated values will be retained until the application is submitted.

Form pre-population is achieved by defining field values in the query string of the entry page URL.

#### IMPORTANT: All field values must be correctly URL encoded.

It should be noted that as the field values are provided in the URL query string they will be transmitted across the internet in the clear, i.e. not securely. Because of this it is recommended that this facility be only used to pre-populate non-sensitive information such as name, home address, email address and telephone number fields.

## **Examples**

Below there are some examples of query strings

- Example 1: Call the homepage https://www.247creditloan.com/?aff=TEST
- Example 2: Call the application page directly
